

Brushsinker for artificial grass

**Very efficient triangular lot for brushing of artificial turf pitches.
The brushes have a design and quality that they do not clog up with loose grass fiber.
Drawbar in all three corners.**

It is important that the screws and the vehicle is in such a height that the brushsinker is 20-30 cm higher than a machine pulling point. If not, it may result in the tow becomes unstable and the brushes do not get the necessary contact with the substrate. Recommended speed in use is 15-20 km/h.

SPECIFICATIONS:

Produced in aluminium

Weight: 25 kg

Dimension: 230 x 230 x 230 cm
